WRUBLE,

Defendants.

Civil Action No.

**CLASS ACTION COMPLAINT
FOR VIOLATION OF THE
FEDERAL SECURITIES LAWS**

JURY TRIAL DEMANDED

Plaintiff, by her attorneys, alleges the following upon personal knowledge as to herself and her own acts and upon information and belief based upon the investigation of Plaintiff's attorneys as to all other matters. Plaintiff believes that further substantial evidentiary support will exist for the allegations set forth below after a reasonable opportunity for discovery.

SUMMARY OF ACTION

1. This is a class action on behalf of purchasers of shares of Oppenheimer AMT-Free Municipals Fund ("Oppenheimer AMT" or the "Fund") investing in high-yield municipal securities that pay interest that is exempt from federal income tax.

2. The Fund employed strategies which enhanced its reported returns while, at the same time, exposing the Fund to a greater risk of price declines in the value of its portfolio securities in the event of any illiquidity in the market for municipal securities. However, in doing so, the prospectuses and other sales materials employed in selling and marketing the Fund failed to disclose that these very strategies exposed the Fund to substantially greater risk of loss due to Oppenheimer AMT being forced to sell large blocks of portfolio securities at disadvantageous times and prices reduced from those at which the securities were previously carried on Oppenheimer AMT's books.

3. These undisclosed risks were first disclosed in a prospectus supplement dated October 21, 2008 (the "Prospectus Supplement") and followed a precipitous decline in the value of the Fund's shares which materially exceeded the decline in value experienced by a peer group of municipal bond funds which did not employ the same risky strategies employed by the Fund.

4. Plaintiff purchased shares of the Fund issued pursuant to a prospectus which failed to disclose the relevant risk factors, which resulted in this financial loss, and is bringing this action on her behalf and on behalf of a class (the "Class") of similarly situated investors to recover damages.

JURISDICTION AND VENUE

5. The claims asserted herein arise under Sections 11, 12(a)(2) and 15 of the Securities Act of 1933 (the “Securities Act” or the “1933 Act”), 15 U.S.C. §§77k, 77l(a)(2) and 77o. Jurisdiction is conferred by Section 22 of the Securities Act, 15 U.S.C. §77v. Venue is proper pursuant to Section 22 of the Securities Act because the acts alleged occurred in the jurisdiction and the plaintiff resides in the jurisdiction.

PARTIES

6. Plaintiff [REDACTED] purchased shares of the Fund as detailed in the attached Certification and was damaged thereby.

7. Defendant Oppenheimer AMT, located at 6803 South Tucson Way, Centennial, Colorado 80112, is a diversified open-end mutual fund which seeks to provide a high level of income exempt from federal income tax. Oppenheimer AMT has more than \$1 billion under management and its shares are offered in three separate classes: Class A Shares requiring the payment of an initial sales charge; Class B Shares on which no initial sales charge is paid at the time of purchase, but requiring a 5% contingent deferred sales charge if the shares are sold within one year or a 2% contingent deferred sales charge if the shares are sold within five years of buying them; Class C Shares on which no initial sales charge is paid, but requiring a 1% contingent deferred sales charge if the shares are sold within one year of buying them.

8. Defendant Oppenheimer Funds, Inc. (“Oppenheimer”), located at Two World Financial Center, 225 Liberty Street, 11th Floor, New York, New York 10281, is the Fund’s manager and is responsible for choosing the Fund’s investments and handling its day-to-day business. Oppenheimer earns an advisory fee calculated based on the net assets of the Fund.

The Fund's advisory fee for the period ended July 31, 2008 was 0.41% of average annual net assets for each class of shares which amounted to approximately \$4.35 million.

9. Defendant John V. Murphy is a Trustee of the Fund and is also the Chairman, Chief Executive Officer and a Director of Oppenheimer.

10. Defendant David K. Downes has been a Trustee of the Fund since 2007 and oversees 67 portfolios in the Oppenheimer Funds complex.

11. Defendant Brian F. Wruble has been a Trustee of the Fund since 2005 and oversees 67 portfolios in the Oppenheimer Funds complex. Messrs. Downes and Wruble also serve on the Boards of over 60 Oppenheimer Funds. Murphy, Downes and Wruble are hereafter referred to as the "Individual Defendants."

CLASS ACTION ALLEGATIONS

12. Plaintiff brings this action as a class action pursuant to Rule 23(a) and (b)(3) of the Federal Rules of Civil Procedure on behalf of a class consisting of all persons who purchased the Class A Shares, Class B Shares and Class C Shares of the Fund from May 8, 2006 through October 21, 2008 (the "Class Period") and were damaged thereby, excluding Defendants, the officers and directors of the Fund, members of the Defendants' immediate families and the Defendants' legal representatives, heirs, successors, and assigns, and any entity in which any of the Defendants have or had a controlling interest or unique contractual arrangement.

13. Members of the Class are so numerous that joinder of all members is impracticable. Although the exact number of Class members is unknown to Plaintiff at this time and can only be ascertained through appropriate discovery, based upon the size of the Fund being greater than \$1 billion, it is likely that there are thousands or tens of thousands of Class members.

Members of the Class may be identified from records maintained by Oppenheimer AMT, Oppenheimer or their agents, and may be notified of the pendency of this action by mail, using a form of notice similar to that customarily used in securities class actions.

14. Plaintiff's claims are typical of the claims of the other members of the Class. Plaintiff and the other members of the Class have sustained damages because of Defendants' unlawful activities alleged herein. Plaintiff has retained counsel competent and experienced in class and securities litigation and intends to prosecute this action vigorously. The interests of the Class will be fairly and adequately protected by Plaintiff. Plaintiff has no interests which are contrary to or in conflict with those of the Class that Plaintiff seeks to represent.

15. A class action is superior to all other available methods for the fair and efficient adjudication of this controversy. Plaintiff knows of no difficulty to be encountered in the management of this action that would preclude its maintenance as a class action.

16. Common questions of law and fact exist as to all members of the Class and predominate over any questions solely affecting individual members of the Class. Among the questions of law and fact common to the Class are:

- (a) whether the federal securities laws were violated by Defendants' acts as alleged herein;
- (b) whether Defendants misstated and/or omitted to state material facts in their public statements; and
- (c) whether the members of the Class have sustained damages as a result of Defendants' conduct and the proper measure of such damages.

SUBSTANTIVE ALLEGATIONS

17. Municipal securities are fixed-income securities primarily issued by states, cities, counties and other governmental entities to finance the development of local communities. The interest received from most municipal bonds is exempt from federal, state or local income taxes in the municipalities where the bonds are issued.

18. Investors seeking to invest in tax free bonds have a relatively wide variety of investment options. They can purchase bonds directly or they can buy shares of mutual funds which invest in those bonds. The mutual funds, in turn, can be either closed-end funds or open-end funds. Closed-end funds generally have a fixed number of shares which trade on a stock exchange like regular stocks. The price an investor pays for those funds can be either greater, less than or equal to their net asset value (“NAV”), *i.e.*, the total recorded value of the assets owned by the fund divided by the number of shares outstanding. In contrast, open-end funds continuously offer their shares for sale to members of the investing public generally pursuant to prospectuses which are filed as part of registration statements with the Securities and Exchange Commission (“SEC”) and, at the same time, generally offer to redeem or buy back those shares at the same quoted NAV.

19. Oppenheimer AMT is an open-ended mutual fund and one of the largest such mutual funds specializing in federal tax free investments. The Fund seeks a high level of current interest income exempt from federal income taxes as is available from investing in municipal securities, while attempting to preserve capital. To do this, the Fund invests mainly in municipal securities that pay interest that is exempt from federal individual income tax, primarily municipal bonds, municipal notes, interests in municipal leases, and tax-exempt commercial paper. The

Fund will not invest in municipal securities the interest on which would be subject to the Federal alternative minimum tax on individuals and corporations. The Fund is sold through an extensive network of financial advisers compensated based upon sales commission and/or asset management fees.

20. Oppenheimer AMT has been able to successfully compete within this arena and grow to become a billion dollar fund because of its reporting superior historical returns. These superior returns were, in turn, largely generated by the Fund investing as much as 20% of its assets in derivative securities known as “inverse floaters” which are derivative instruments that pay interest at rates that move in the opposite direction of yields on short-term securities.

21. Inverse floaters, such as those employed by the Fund, are generally created by depositing a long-term bond into a trust which is used to provide collateral for short term securities issued based upon the security of the long-term instrument. Short-term municipal bond rates are lower than the long term rates earned on the underlying instrument which serves as the basis for creating the trust. This allows for a leveraged or increased return to the Fund which created the trust.

22. Under inverse floater agreements, if the remarketing agent that offers the short-term security is unable to sell them, or if the holders tender (or put) them for repayment of principal and the remarketing agent is unable to remarket them, the remarketing agent may cause the trust to be collapsed and the Fund is then required to repay the principal amount of the tendered securities. In order to do so, the Fund must, *i.e.*, it is forced, to sell securities from its portfolio regardless of market conditions.

23. These collapses of inverse floaters forced the Fund's hand to rapidly sell large blocks of securities held in its portfolio in order to make good on its contractual obligations. In order to accomplish these sales and provide the liquidity necessary to honor the Fund's contractual obligations under the inverse floater agreements, Oppenheimer AMT was forced to accept prices far below the values at which the bonds were carried on its books.

24. This was a risk factor which was always present wherever inverse floaters were employed. However, no disclosure was made in any of the prospectuses filed as part of registration statements with respect to the sale of the Fund's shares.

25. Instead, under the general risk disclosures relating to derivative investments, the following risks were disclosed:

RISKS OF DERIVATIVE INVESTMENTS. The Fund can use derivatives to seek increased returns.

In general terms, a derivative investment is an investment contract whose value depends on (or is derived from) the value of an underlying asset, interest rate or index. Covered call options, "inverse floaters" and floating rate variable rate obligations are examples of derivatives the Fund can use. The Fund typically does not use hedging instruments, such as options, to hedge investment risks.

If the issuer of the derivative investment does not pay the amount due, the Fund can lose money on its investment. Also, the underlying security or investment on which the derivative is based, and the derivative itself, might not perform the way the Manager expected it to perform. If that happens, the Fund will get less income than expected or its hedge might be unsuccessful, and its share prices could fall. The Fund has limits on the amount of particular types of derivatives it can hold. However, using derivatives can increase the volatility of the Fund's share prices and can cause the Fund to lose money on its investments. Some derivatives may be illiquid, making it difficult for the Fund to sell them quickly at an acceptable price.

26. Specific risks associated with Inverse Floaters were further described in the November 28, 2005 prospectus as follows:

Inverse Floaters Have Special Risks. Variable rate bonds known as "inverse floaters" pay interest at rates that move in the opposite direction of yields on short-term bonds in response to market changes. As interest rates rise, inverse floaters produce less current income, and their market value can become volatile. Inverse floaters are a type of "derivative security." Some have a "cap" so that if interest rates rise above the "cap," the security pays additional interest income. If rates do not rise above the "cap," the Fund will have paid an additional amount for a feature that proves worthless. The Fund will not invest more than 20% of its total assets in inverse floaters.

Inverse Floaters. "Inverse floaters" are municipal obligations on which the interest rates typically fall as market rates increase and increase as market rates fall. Inverse floaters are a form of derivative instruments. Changes in market interest rates or the floating rate of the security inversely affect the residual interest rate of an inverse floater. As a result, the price of an inverse floater will be considerably more volatile than that of a fixed-rate obligation when interest rates change.

To provide investment leverage, a municipal issuer might decide to issue two variable rate obligations instead of a single long-term, fixed-rate bond. For example, the interest rate on one obligation reflects short-term interest rates. The interest rate on the other instrument, the inverse floater, reflects the approximate rate the issuer would have paid on a fixed-rate bond, multiplied by a factor of two, minus the rate paid on the short-term instrument. The two portions may be recombined to create a fixed-rate bond. The Manager might acquire both portions of that type of offering, to reduce the effect of the volatility of the individual securities. This provides the Manager with a flexible portfolio management tool to vary the degree of investment leverage efficiently under different market conditions. The Fund can invest up to 20% of its total assets in inverse floaters.

Inverse floaters may offer relatively high current income, reflecting the spread between long-term and short-term tax exempt interest rates. As long as the municipal yield curve remains relatively steep and short-term rates remain relatively low, owners of inverse floaters will have the opportunity to earn interest at above-market rates because they receive interest at the higher long-term rates but have paid for bonds with lower short-term rates. If the yield curve flattens and shifts upward, an inverse floater will lose value more quickly than a conventional long-term bond. The Fund will invest in inverse floaters to seek higher tax-exempt yields than are available from fixed-rate bonds that have comparable maturities and credit ratings. In some cases the holder of an inverse floater may have an option to convert the floater to a fixed-rate bond, pursuant to a "rate-lock option."

Some inverse floaters have a feature known as an interest rate "cap" as part of the terms of the investment. Investing in inverse floaters that have interest rate caps might be part of a portfolio strategy to try to maintain a high current yield for the Fund when the Fund has invested in inverse floaters that expose the Fund to the risk of short-term interest rate fluctuations. "Embedded" caps can be used to hedge a portion of the Fund's exposure to rising interest rates. When interest rates exceed a pre-determined rate, the cap generates additional cash flows that offset the decline in interest rates on the inverse floater, and the hedge is successful. However, the Fund bears the risk that if interest rates do not rise above the pre-determined rate, the cap (which is purchased for additional cost) will not provide additional cash flows and will expire worthless.

27. The actual relevant risk associated with Inverse Floaters was not disclosed until the filing of a Prospectus Supplement on October 21, 2008 which replaced existing Inverse Floater disclosures with the following:

Inverse Floaters

The Fund may invest in inverse floaters to seek greater income and total return. The Fund will not expose more than 20% of its total assets to the effects of leverage from its investments in inverse floaters. An inverse floater is a derivative instrument, typically created by a trust that divides a fixed-rate municipal security into two securities: a short-term tax exempt floating rate security (sometimes referred to as a "tender option bond") and a long-term tax exempt floating rate security (referred to as a "residual certificate" or "inverse floater") that pays interest at rates that move in the opposite direction of the yield on the short-term floating rate security. The purchaser of a "tender option bond" has the right to tender the security periodically for repayment of the principal value. As short-term interest rates rise, inverse floaters produce less current income (and, in extreme cases, may pay no income) and as short-term interest rates fall, inverse floaters produce more current income.

To facilitate the creation of inverse floaters, the Fund may purchase a fixed-rate municipal security and subsequently transfer it to a broker-dealer (the sponsor), which deposits the municipal security in a trust. The trust issues the residual certificates and short-term floating rate securities. The trust documents enable the Fund to withdraw the underlying bond to unwind or "collapse" the trust (upon tendering the residual certificate and paying the value of the short-term bonds and certain other costs). The Fund may also purchase inverse floaters created by municipal issuers directly or by other parties that have deposited municipal bonds into a sponsored trust.

The Funds investments in inverse floaters involve certain risks. The market value of an inverse floater residual certificate can be more volatile than that of a

conventional fixed-rate bond having similar credit quality, maturity and redemption provisions. Typically, inverse floater residual certificates tend to underperform fixed rate bonds when long-term interest rates are rising but tend to outperform fixed rate bonds when long-term interest rates are stable or falling. Inverse floater residual certificates entail a degree of leverage because the trust issues short-term securities in a ratio to the residual certificates with the underlying long-term bond providing collateral for the obligation to pay the principal value of the short-term securities if and when they are tendered. If the Fund has created the inverse floater by depositing a long-term bond into a trust, it may be required to provide additional collateral for the short-term securities if the value of the underlying bond deposited in the trust falls.

An inverse floater that has a higher degree of leverage is typically more volatile with respect to its price and income than an inverse floater having a lower degree of leverage. **Under inverse floater arrangements, if the remarketing agent that offers the short-term securities for sale is unable to sell them, or if the holders tender (or put) them for repayment of principal and the remarketing agent is unable to remarket them, the remarketing agent may cause the trust to be collapsed, and in the case of floaters created by the Fund, the Fund will then be required to repay the principal amount of the tendered securities. During times of market volatility, illiquidity or uncertainty, the Fund could be required to sell other portfolio holdings at a disadvantageous time to raise cash to meet that obligation.**

Some inverse floaters may have a "cap," so that if interest rates rise above the cap, the security pays additional interest income. If rates do not rise above the cap, the Fund will have paid an additional amount for that feature that has proved worthless. (Emphasis added).

28. The prospectuses initially generally disclosed that some derivatives may be illiquid and the Fund may have difficulty selling them quickly at acceptable prices, *i.e.*, the Fund may have to hold the Inverse Floaters until maturity or sell them slowly over time. However, another undisclosed material risk of investing in Inverse Floaters was that the owners of the short-term securities sold by the trust created for the purposes of issuing Inverse Floaters could effectively collapse the trusts and require the underlying securities to be sold immediately forcing the sale of portfolio securities at disadvantageous times and prices.

29. These conditions caused a sharp decline in the value of the Fund's shares. Thus,

the NAV of the Class A Shares declined from a closing price of \$8.15 per share on January 2, 2008 to close at \$5.56 per share on October 20, 2008, a decline of close to 32%, an unusually high decline and far exceeding the decline of competing national municipal bond funds which did not employ derivative instruments such as the inverse floaters utilized by the Fund.

COUNT I

Violations of Section 11 of the Securities Act Against Defendants Oppenheimer AMT and the Individual Defendants

30. Plaintiff repeats and realleges each and every allegation above as if set forth fully herein. This Count is brought pursuant to Section 11 of the Securities Act, 15 U.S.C. §77k, against Defendants Oppenheimer AMT and the Individual Defendants. This claim is not based on and does not sound in fraud.

31. This claim is brought by Plaintiff on her own behalf and on behalf of other members of the Class who acquired Fund shares pursuant to prospectuses dated: (a) November 28, 2005 ; (b) September 27, 2006, supplemented on January 19, 2007 and January 23, 2007; (c) March 8, 2007, supplemented on July 6, 2007, and October 22, 2007; (d) October 26, 2007, supplemented on December 19, 2007, July 1, 2008, and October 21, 2008; (e) November 28, 2008, supplemented on December 10, 2008, and March 17, 2009; (collectively the "Prospectus") all of which were filed with the SEC as part of registration statements (the "Registration Statements"). Each Class member acquired their shares pursuant to the Prospectus and Registration Statements.

32. Oppenheimer AMT is the issuer of the securities through the Registration Statements and Prospectus. The Individual Defendants signed, either personally or through an

attorney-in-fact, the Registration Statements.

33. Defendants owed to the purchasers of the stock obtained through the Registration Statement and Prospectus the duty to make certain that all relevant material risk factors potentially affecting the Fund's performance be disclosed in the Registration Statements at the time the Registration Statements became effective to ensure that such statements were true and correct, and that there was no omission of material facts required to be stated in order to make the statements contained in the Registration Statements not misleading.

34. None of the Defendants named in this Count made a reasonable investigation or possessed reasonable grounds for the belief that the statements contained in the Registration Statement and Prospectus were true or that there was no omission of material facts necessary to make the statements made therein not misleading.

35. Defendants issued and disseminated, caused to be issued and disseminated, and participated in the issuance and dissemination of, material misstatements to the investing public which were contained in the Registration Statements and Prospectus, which misrepresented or failed to disclose, *inter alia*, the facts set forth above. By reason of the conduct herein alleged, each Defendant violated Section 11 of the Securities Act.

36. Oppenheimer AMT is the issuer of the stock sold via the Registration Statements and Prospectus. As issuer of the stock, these defendants are strictly liable to Plaintiff and the Class for the material misstatements and omissions therein.

37. At the times they obtained their shares of the Fund, Plaintiff and members of the Class did so without knowledge of the facts concerning the misstatements or omissions alleged herein.

38. This action is brought within one year after discovery in this or a related action of the untrue statements and omissions in and from the Registration Statements and Prospectus that should have been made through the exercise of reasonable diligence, and within three years of the time that the securities upon which this Count is brought were offered to the public.

39. By virtue of the foregoing, Plaintiff and the other members of the Class are entitled to damages under Section 11 as measured by the provisions of Section 11(e), from the Defendants and each of them, jointly and severally.

COUNT II

Violations of Section 12(a)(2) of the Securities Act Against Oppenheimer

40. Plaintiff repeats and realleges each and every allegation above as if set forth fully herein. This Count is brought for violation of Section 12(a)(2) of the Securities Act, 15 U.S.C. 771(a)(2), against Oppenheimer.

41. As set forth more specifically above, the Prospectus failed to disclose material facts necessary in order to make the statements, in light of the circumstances in which they were made, not misleading.

42. Oppenheimer, through its agents, sold and/or solicited the sale of Oppenheimer AMT shares offered pursuant to the Registration Statement and Prospectus for its financial gain.

43. Plaintiff and other members of the Class did not know, nor could they have known, of the untruths or omissions contained in the Registration Statement and Prospectus, including that the price of the Fund's shares were not properly determined.

44. The Defendants named in this Count were obligated to make a reasonable and diligent investigation of the statements contained in the Prospectus to ensure that such statements

were true and that there was no omission of material fact required to be stated in order to make the statements contained therein not misleading. None of the Defendants named in this Count made a reasonable investigation or possessed reasonable grounds for the belief that the statements contained in the Prospectus were accurate and complete in all material respects.

45. This claim was brought within one year after discovery in this or a related action of the untrue statements and omissions in and from the Prospectus that should have been made through the exercise of reasonable diligence, and within three years of the time that the securities upon which this Count is brought were offered to the public by way of a Prospectus.

46. By reason of the misconduct alleged herein, the Defendants named in this Count violated Section 12(a)(2) of the Securities Act and are liable to Plaintiff and other members of the Class who purchased or acquired the Fund's shares by way of the Prospectus, each of whom has been damaged as a result of such violations.

47. Plaintiff and the other members of the Class who purchased the Fund's shares pursuant to the Prospectus hereby seek rescission of their purchases and hereby tender to the defendants named in this Count those shares, which Plaintiff and other members of the Class continue to own, in return for the consideration paid for those securities, together with interest thereon.

COUNT III

Violations of Section 15 of the Securities Act Against Oppenheimer

48. Plaintiff repeats and realleges each and every allegation contained above as if fully set forth herein. This claim is not based on and does not sound in fraud.

49. This claim is asserted against Oppenheimer which, by virtue of being the Fund's manager and responsible for choosing the Fund's investments and handling its day-to-day business, was a control person of Oppenheimer AMT during the relevant time period. Oppenheimer was in a position to control, and did control, the inclusion of the false and incomplete statements and omissions in the Registration Statement and Prospectus.

50. For the reasons set forth above, Oppenheimer is liable to Plaintiff and the members of the Class who purchased the Fund's Common Stock based on the untrue statements and omissions of material fact contained in the Registration Statement and Prospectus, pursuant to Section 11 of the Securities Act, and were damaged thereby.

51. Oppenheimer did not make a reasonable investigation or possess reasonable grounds for the belief that the statements contained in the Registration Statement and Prospectus were accurate and complete in all material respects. Had it exercised reasonable care, Oppenheimer could have known of the material misstatement and omissions alleged herein.

52. This claim was brought within one year after the discovery of the untrue statements and omissions in the Registration Statement and Prospectus and within three years after the Fund's Common Stock was sold to the Class in connection with the Offering.

53. By reason of the misconduct alleged herein, for which the Fund is primarily liable, as set forth above, Oppenheimer is jointly and severally liable with and to the same extent as the Fund pursuant to Securities Act.

BASIS FOR INFORMATION AND BELIEF

54. Plaintiff's information and belief is based upon, among other things, a review of relevant filings made with the SEC, a review of pricing information with respect to Oppenheimer AMT, competing funds and news reports.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff, on behalf of herself and the other members of the Class, prays for judgment as follows:

(a) declaring this action to be a class action properly maintained pursuant to the Federal Rules of Civil Procedure, certifying the Class with Plaintiffs as Class Representatives, and certifying Plaintiff's counsel as Class Counsel;

(b) awarding Plaintiff and the other members of the Class damages against Defendants, jointly and severally, together with interest thereon;

(c) awarding Plaintiff and the other members of the Class rescission on Count II to the extent they still hold Fund shares, or if sold, awarding rescissory damages in accordance with Section 12(a)(2) of the Securities Act from the Defendants named in that Count;

(d) awarding Plaintiff and the other members of the Class their costs and expenses of this litigation, including reasonable attorneys fees, accountants fees and experts fees and other costs and disbursements; and

(e) awarding Plaintiff and the other members of this Class such other and further relief as may be just and proper under the circumstances.

JURY TRIAL DEMANDED

Plaintiff hereby demands a trial by jury.

Dated: May 13, 2009
